

An Introduction to Bayesian Statistics

Speaker: Mattias Villani

Professor of Statistics at Stockholm University

Image by Freepik

We welcome you to a lecture on Bayesian Statistics, designed to introduce you to the fundamentals of this statistical approach. The lecture will cover the basic principles of Bayesian methods and their applications in various fields. In this 1.5-hour session, you will gain a clear understanding of how Bayesian inference differs from classical/frequentist methods, learn practical ways to implement Bayesian models, and explore real-world examples.

Thursday, October 3rd, 11:00 to 12:30

Venue: Atrium, Nobels väg 12B, Solna campus

Fika will be provided!

Arranged by the student representatives in the Doctoral Programme in Epidemiology and the Division of Clinical Epidemiology
