

# Scientific conduct and research communication during the Covid-19 pandemic

We invite you to a webinar on the **impact of the Covid-19 pandemic on the conduct of scientific research and communication of its results**. Two distinguished guests will present and answer your questions on study quality, reproducibility, ethics, publication and communication of results with the scientific community, stakeholders, and the general public.

## THE SPEAKERS

**Marcus Munafò** is a Professor of Biological Psychology at the University of Bristol. His research focuses on understanding pathways into health behaviours and mental health with a focus on tobacco and alcohol use. Amongst his research interests is the role of incentive structures in science and how these shape the robustness and reproducibility of scientific research.

**Miguel Hernán** is the Kolokotronis Professor of Biostatistics and Epidemiology at Harvard University and Visiting Professor at Karolinska Institutet. His research focuses on the design and analysis of healthcare databases and randomized trials to identify strategies for the prevention and treatment of diseases. He is also a co-investigator of a randomized trial for the prevention of serious Covid-19 amongst healthcare personnel in Spain.
