

## Epidemiology Methods Series, IMM

# Contributions of the Rochester Epidemiology Project (REP) to medicine and public health

Jennifer St. Sauver

The Mayo Clinic, Division of Epidemiology, Department of Health Sciences Research

Welcome to the third **Epidemiology Methods Series** at the Institute of Environmental Medicine, Karolinska Institutet. We're pleased to be joined by **Jennifer St. Sauver** from the Mayo Clinic, Division of Epidemiology, Department of Health Sciences Research to give a talk titled: "**Contributions of the Rochester Epidemiology Project (REP) to medicine and public health**".

In this talk, Dr. St. Sauver will discuss a population-based epidemiologic research project that began in 1966 in southern Minnesota, U.S.A. She will describe the history of this project, give examples of REP studies that have contributed to medicine and public health, and discuss how the project is currently evolving in the era of big data.

**Register:** [https://survey.ki.se/epimethodsseries\\_may21](https://survey.ki.se/epimethodsseries_may21)

**Date:** Tuesday 18<sup>th</sup> May

**Time:** 15.00–16.00 (Stockholm)

**Place:** Online via Zoom (link sent out day before event)
